**Texas Hospital Association Foundation Peer Review Network**

The **THAF Peer Review Network** is a comprehensive cloud-based system that facilitates the medical peer review process in a secure, efficient and convenient manner.

As a member of the THAF PRN, you will benefit by having a single platform for both internal and network (external to your facility, but within the THAF PRN) review processes to ensure the highest quality standard of patient care is being delivered.

---

**Benefits:**

- Improved quality of care provided by medical staff;
- Monitoring of ongoing performance of medical staff;
- Identification of areas for performance improvement;
- Meeting regulatory and credentialing requirements; and
- Streamlining the management of the peer review process.

---

**Access to a Network Peer Review provides support when:**

- There is a conflict of interest for available reviewers;
- Internal reviewers lack the necessary clinical expertise;
- The need to eliminate provider bias arises;
- Ambiguous or conflicting findings are present; and, or
- There is a lack of strong consensus for a finding.

---

**THAF Peer Review Network supports:**

- Portable
- Easy to use
- Secure
- De-identified
- HIPAA Compliant
