

Jackson Physician Search  
2655 Northwinds Parkway  
Alpharetta, GA 30009

To whom it may concern:

Our partnership with Jackson Physician Search began in the fall of 2015. We had received approval to move forward with the development of several, Community Health & Wellness Centers throughout the greater Houston area. Each one of these centers would be staffed with multiple physician specialties including family medicine, pediatrics and psychiatry. In addition, we had other needs throughout our practice plan including hematology coverage for our Comprehensive Sickle Cell Center and a need for an endocrinologist at one of our community-based clinics in north Houston. The road ahead looked challenging, but with the help of Jackson Physician Search, we have addressed our needs in less than a year and a half. This included the placement of eight, highly qualified physicians from across the country. Christen Wrensen, Senior Director of Recruiting, was instrumental in facilitating the placement of these physicians throughout our practices. Her diligence and familiarity with the nuances of academic medicine, helped streamline the process. We greatly appreciate her compassion and ability to establish a fine balance between patience and persistence, with her clients.

We look forward to integrating these physicians into our practice, and helping us sustain our great impacts on the greater Houston community.

Sincerely,

Sharif Mansur  
Assistant Director, Healthcare Transformation Initiatives
