

## HEALTH CARE TECHNOLOGY SOLUTIONS

SPECTRACORP is a diversified technology company that has been delivering state-of-the-art communications services to the healthcare industry for over two decades. We have teamed with industry leaders to offer a variety of products that enable our clients to focus on providing quality care to patients and manage their day-to-day operations .

## LANGUAGE INTERPRETATION SERVICES

SPECTRACORP's partnerships with industry leaders provide hospitals with virtually immediate access to Over-The-Phone and Video Interpretation Services. These offerings facilitate hospital communications with the Limited English Proficient and deaf communities. Features include competitive, flat rate pricing, customizable log-in menus, and 24/7 Customer Support. Training and reference materials available at no charge.

## TELECOMMUNICATIONS MANAGEMENT

SPECTRACORP has helped the healthcare industry to manage their communications systems and costs for over two decades. Our expertise enables IT professionals to focus on managing their day-to-day operations while we analyze carrier invoices, identify and research technology solutions, and facilitate the installation, disconnection and maintenance of network services. *We can reduce long distance costs to THA members up to 60%, with no contract term or minimum monthly commitment!*

## RURAL HEALTHCARE SUBSIDY ADMINISTRATION

The FCC has made \$400 million available to rural health care providers to be reimbursed for *up to 65%* of their internet, data, and telecom costs. SPECTRACORP's consulting services and back office support have enable over 1500 healthcare providers to qualify for this program. Last year, our clients received over \$7M in funding. Together with our filing partners, we help to ensure that our clients maximize their subsidy opportunities.
