**COMMISSIONER SID MILLER**

## ACCREDITED CONTINUING EDUCATION

### Accreditation Statement

JOINTLY ACCREDITED PROVIDER™  
INTERPROFESSIONAL CONTINUING EDUCATION

In support of improving patient care, this activity has been planned and implemented by AXIS Medical Education and Texas Hospital Association. AXIS Medical Education is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

# Learning Objectives

**Describe basics of quality improvement**

**Describe use of data for quality improvement activities**

**Describe role of frontline staff in quality improvement processes**

# Critical Access Hospital Quality Improvement – FLEX Program

---

- Work with partners to improve quality across the state of Texas
  - State Office of Rural Health, Texas A&M RCHI, Texas Hospital Association
- Core Measures Domains
  - Patient Safety / Inpatient
  - Patient Engagement
  - Care Transitions
  - Outpatient

# Current Medicare Beneficiary Quality Improvement Project (MBQIP) Measures

MBQIP measures are divided into two categories:

- **Core MBQIP Measures** are those that all state Flex Programs are expected to support. Reporting on these measures contributes towards a CAH's Flex [eligibility requirements](#).
- **Additional MBQIP Measures** are those that state Flex Programs can elect to support in addition to the Core measures, particularly in alignment with other partners or initiatives. While these measures are also rural relevant, they may not be as widely applicable across all CAHs. The MBQIP Measures resource includes a list of potential additional measures, but that list is not meant to be exhaustive. Flex programs can propose to work on other quality improvement topics within the four MBQIP domains. If there is not a nationally standardized or standardly reported measure currently available, Flex programs can propose a data collection mechanism.

Core MBQIP Measures			
Patient Safety/Inpatient	Patient Engagement	Care Transitions	Outpatient
<p><b>HCP/IMM-3 (formerly OP-27):</b> Influenza Vaccination Coverage Among Healthcare Personnel (HCP)</p> <p><b>Antibiotic Stewardship:</b> Measured via Center for Disease Control National Healthcare Safety Network (CDC NHSN) Annual Facility Survey</p>	<p><b>Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS)</b> <i>The HCAHPS survey contains 21 patient perspectives on care and patient rating items that encompass eight key topics:</i></p> <ul style="list-style-type: none"> <li>• Communication with Doctors</li> <li>• Communication with Nurses</li> <li>• Responsiveness of Hospital Staff</li> <li>• Communication about Medicines</li> <li>• Discharge Information</li> <li>• Cleanliness of the Hospital Environment</li> <li>• Quietness of the Hospital Environment</li> </ul>	<p><b>Emergency Department Transfer Communication (EDTC)</b> <i>1 composite; 8 elements</i></p> <ul style="list-style-type: none"> <li>• <b>All EDTC Composite</b></li> <li>• Home Medications</li> <li>• Allergies and/or Reactions</li> <li>• Medications Administered in ED</li> <li>• ED provider Note</li> <li>• Mental Status/Orientation Assessment</li> <li>• Reason for Transfer and/or Plan of Care</li> </ul>	<p><b>AMI:</b></p> <ul style="list-style-type: none"> <li>• <b>OP-2:</b> Fibrinolytic Therapy Received within 30 minutes</li> <li>• <b>OP-3:</b> Median Time to Transfer to another Facility for Acute Coronary Intervention</li> </ul> <p><b>ED Throughput</b></p> <ul style="list-style-type: none"> <li>• <b>OP-18:</b> Median Time from ED Arrival to ED Departure for <i>Discharged</i> ED Patients</li> <li>• <b>OP-22:</b> Patient Left Without Being Seen</li> </ul>

# Quality Improvement

---

# Quality Improvement

- **Quality improvement strives to make a difference to patients by improving safety, effectiveness, and delivery of care by:**
  - **Using understanding of our complex healthcare environment**
  - **Applying a systematic approach**
  - **Designing, testing, and implementing changes using real time measurement for improvement**

# Why is Quality Important?

- **Approximately 250,000 people die each year from medical errors – 3<sup>rd</sup> leading cause of death behind cancer and heart disease**
- **Medical errors cost approximately \$20 billion each year**
- **One CAUTI can result in over \$10,000 cost to facility**
- **Average cost of patient fall with injury is around \$30,000**

# Importance to Critical Access Hospitals

---

Smaller in size

---

Lower acute care inpatient volumes

---

Operate with the least amount of  
resources

---

Can't absorb costs associated with  
patient harm events

---

At greatest risk for closure

## Specific to Texas

- Second largest state
- 268,597 square miles
- Approximately 29 million people
- 51 counties (roughly 15% population) considered rural
- **3,014,819 people live in rural Texas**
- **88 Critical access hospitals in Texas**

# How improved quality helps

---

Quality = efficiency

Efficiency =  
reduction in cost

Both lead to  
patient satisfaction

patient satisfaction  
leads to increased  
patient volume

Happy patients  
lead to happy  
staff!!

Less turnover

# Parts to Quality Improvement

Data collection and analysis

Development of action plans

Implementation of change

Continuous monitoring through data collection and analysis

Sustained improvement

# Who decides what we measure?

Issues reported through hospital reporting mechanism

Staff reports  
Patient complaints  
Surveys

Quality improvement project participation

CAHQI Project  
HIIN  
HQIC

Regulatory agencies

CMS

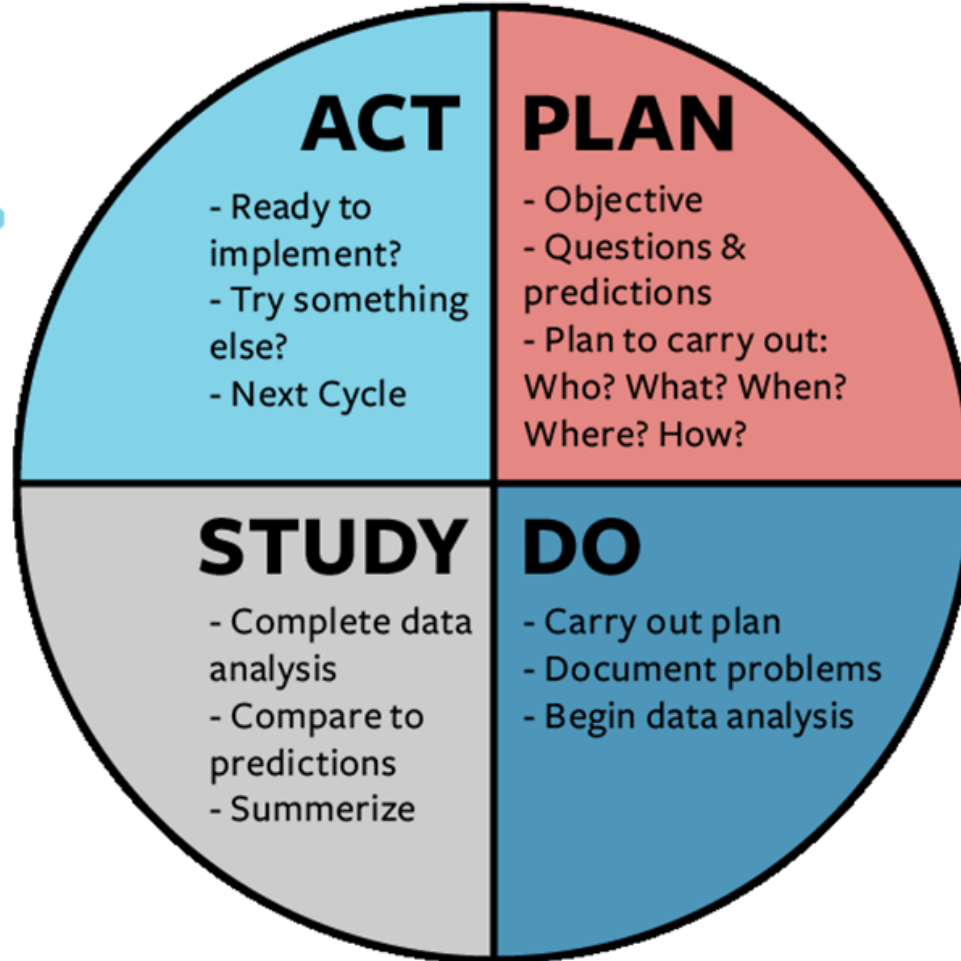

# How does the process work?

# The PDSA Cycle for Learning and Improvement

What's next?

Did it work?

What will happen if we try something different?

Let's try it!

# Who is responsible for what?

## Hospital Boards

- Community leaders
- Invested in success of facility
- Have responsibility to their community

## C-Suite

- Make or break change
- Must recognize importance of quality to overall success

## Department leaders

- Provide guidance to frontline staff
- Help facilitate change

## Frontline staff

- Help identify need for change
- Enact and comply with change to ensure success

Do you know what your quality structure is?

---

Who is responsible for Quality Improvement?

---

Who reports quality information?

---

What is reported?

---

What is done with the information?

Who is responsible for all of this?

---

**EVERYONE!!!!**

**Reporting is key!**

- 
- **In a typical hospital, approximately what percentage of errors is reported?**
    - **A. less than 5**
    - **B. between 25 and 50**
    - **C. 75**
    - **D. between 80 and 90**

- In a typical hospital, approximately what percentage of errors is reported?
  - **A. less than 5**
  - B. between 25 and 50
  - C. 75
  - D. between 80 and 90

# Barriers to reporting

FEAR OF DISCIPLINARY  
ACTION

EMBARRASSMENT

PRIDE

# How do we increase reporting?

---

Culture of Safety

# Culture of Safety

**Agency for Healthcare Research and Quality (AHRQ) defines a culture of safety as one “in which healthcare professionals are held accountable for unprofessional conduct, yet not punished for human mistakes; errors are identified and mitigated before harm occurs; and systems are in place to enable staff to learn from errors and near misses and prevent recurrence” (AHRQ PSNet Safety Culture 2014)**

# Culture of Safety and Quality Improvement

- Encourages reporting – NEAR MISSES
- Heightens awareness of safety
- Uses near misses to avoid bigger events
- Culture of Safety understands the involvement of the system on potential safety issues

# High Reliability

**Operating in complex, high-hazard domains for extended periods without serious accidents or catastrophic failures**

- **Determine areas of high risk**
- **Learn from errors and near misses**
- **Evaluate culture of safety**
- **Enhance the concept of teamwork**
- **Speak up!!**

# How does high reliability work?

Fosters reporting of events

Empowers staff on all levels to lead the way

Encourages participation at all levels

Makes quality a TEAM effort!!

What does this  
mean for you?

# YOU HAVE POWER!!

First to recognize potential  
issues

Knowledge and expertise in  
your area

Ability to bring ideas to the  
table

Ability to help lead change

What you  
can do.....

- Report!!!!
  - Don't wait for significant patient harm event
  - Near misses can prevent bigger problems
  - Stand up, speak up
  - Take ownership

# Get Involved.....

Learn what your hospital reports

Assist with data collection

Follow the data

Texas Hospital Association Foundation

# Quality Improvement Committee / Teams

1

Participate in a  
Quality  
Improvement  
Team

2

Bring ideas to the  
table

3

Develop change  
strategies

4

Lead change on  
your unit

5

Be the voice for  
your department!
