

## Redefining How Work and People Connect Your Marketplace for Healthcare IT Staffing

The way people hire and work has fundamentally changed for good. And it's time for a technology platform focused on the business demands of managing this new flexible workforce. The new Talent economy is upon us, and Revuud is here to help you manage and work within this advancing flexible work mentality.

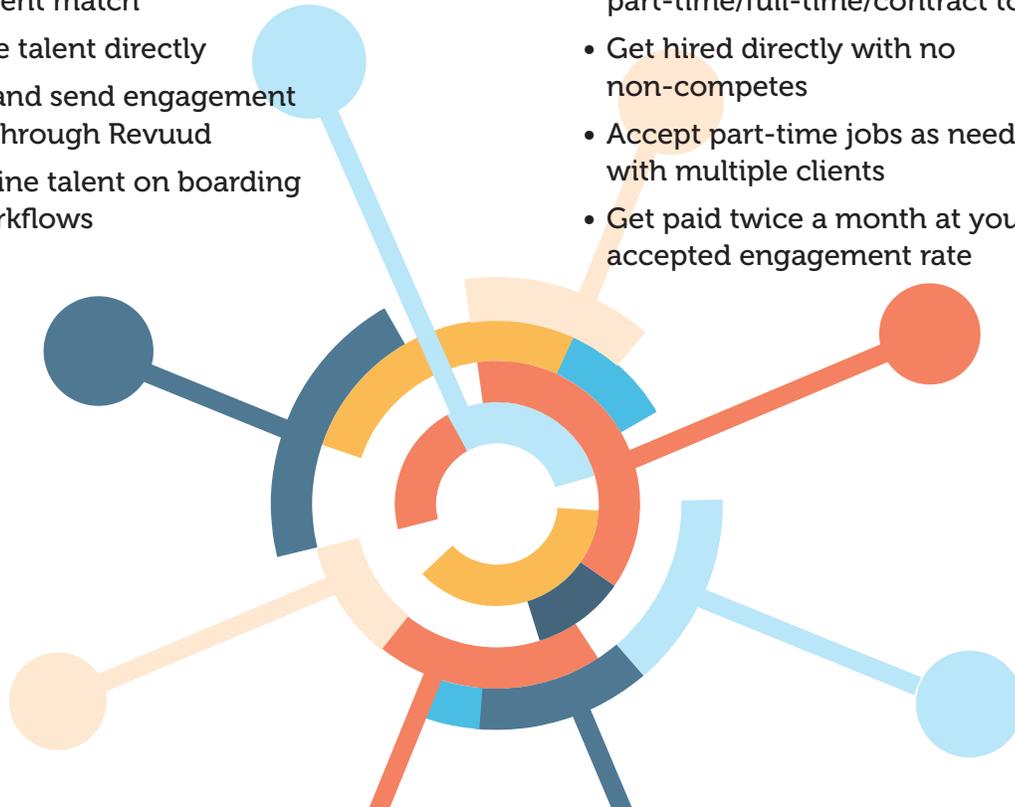

Revuud empowers a connected community of Healthcare Systems and vetted healthcare IT Talent to work together, without a middle person, to fulfill interim, fractional, project, or permanent staffing needs.

### Healthcare Systems

- Build and manage proven talent groups
- Post projects and search for your ideal talent match
- Message talent directly
- Create and send engagement details through Revuud
- Streamline talent onboarding and workflows

### Talent

- Build your profile and access job postings in Revuud
- Set your rates and work availability – part-time/full-time/contract to hire
- Get hired directly with no non-competes
- Accept part-time jobs as needed with multiple clients
- Get paid twice a month at your accepted engagement rate

### Connecting Healthcare Systems and IT Talent Through an Online Marketplace

When Healthcare Systems and Talent are in control of the work engagement, everyone wins. The Healthcare Systems' contractor spend averages 35% less, and Talent takes home significantly more than if they were working through an agency.

# Human-centered Technology at Its Best

Developing trusted relationships is the mission that powers the technology behind the Revuud online marketplace and transforms how Healthcare Systems and Talent connect, engage, and work together.

## Intentionally Connected

Revuud's CEO has almost 20 years of experience in healthcare software and technology innovation, product vision, and executive consulting. Revuud's COO has, for more than 20 years, built businesses from start-up, and strategy to implementation, resulting in a highly successful SaaS software company. Together, they started Revuud with the mindset that there must be a better way for Healthcare Systems and Talent to find and work with one another—without staffing agency inefficiencies and costs.

## Tech Focused

At Revuud, we wanted to incorporate technology that doesn't replace relationships, but rather augments the Healthcare System and Talent relationship by removing the third party from the equation. By bringing together a robust network of the best talent resources, client success managers to help with the day-to-day,

and a recruiting network, we can ensure we connect the best Talent with Healthcare Systems. Technology is here today and plays a valuable role in how people secure and procure work. It's time we embrace this technology to support a scalable workforce.

## Trusted and On-Trend

Our goal is simple—to create and enable a business model for Healthcare Systems and Talent that simplifies the process of building an engaged and flexible workforce. This model supports what the *Center for the Transformation of Work* describes as 'strengthened workforce agility through contingent workers' and 'rebuilding the future of work'. Revuud is well-positioned to ensure that Healthcare Systems and Talent meaningfully connect in a way where Healthcare Systems pay less, and Talent makes more.
