

**Texas Hospital Association
Dues Structure for 2024-2025
ACTIVE MEMBERS**

The Dues Structure for 2025-2027 was approved by the Board at its May 2024 Meeting. Independent hospitals/systems that experience an increase from the 2024 rebasing of expenses of more than \$4,000/\$40,000, are subject to a three-year phase-in, with 50 percent of the increase applied for FY 2025; 25 percent, for 2026; and 25 percent, for 2027.

TYPE 1

Independent Hospitals, General and Special, Short-and Long-Term

Minimum	\$1,858
Maximum	\$147,518

For 2024-2025, member dues are calculated based upon total 2022 hospital operating expenses as reported by the hospital to TDSHS/America Hospital Association/THA survey. Expenses are applied to the tiered dues rate structure specified below. Due to a prior year over estimate on the lobby percent, the non-deductible portion of THA dues for 2024-2025 is 0%.

If a new member also manages hospitals, and all managed hospitals are members, the managed hospitals' expenses may be aggregated with the member's expenses for the calculation of dues. Otherwise, each managed hospital is eligible for membership as an independent hospital.

TYPE 2

Hospital-Based Integrated Health Care Organizations

Minimum	\$1,858
Maximum	None

(All hospitals must be active THA members for the system to be eligible for Type 2.)

For 2024-2025, system dues are based on the combined 2022 operating expenses for all hospitals in the system or organization as reported to the TDSHS/America Hospital Association/THA survey for each hospital. Expenses are applied to the tiered dues rate structure specified below. All hospitals that do not have reported expenses will be billed \$5,305.00 annually until expenses are made available. System dues are calculated based on the composition of the system on August 2024, or at the time of application for membership. Due to a prior year over estimate on the lobby percent, the non-deductible portion of THA dues for 2024-2025 is 0%.

If a member system also manages hospitals, and all managed hospitals are members, the managed hospitals' expenses may be aggregated with the member's expense for the calculation of dues. Otherwise, each managed hospital is eligible for membership as an independent hospital. All hospitals within a system must be active members in THA in order for the Multi-System to be a Type 2 member.

**2024-2025
ACTIVE MEMBER DUES RATES**

Total Expenses	Rate/Thousand
Less than \$150 million.....	\$0.190
\$150 million to \$300 million	\$0.150
\$300 million to \$575 million	\$0.120
More than \$575 million	\$0.100
