

# Workplace Violence Prevention Starts Here

Safety Platform by CENTEGIX is a cloud-based solution that integrates wearable duress technology, incident response, dynamic mapping, accessible reporting, and visitor management into one superior and comprehensive safety solution.

**Workplace violence is an increasing threat to healthcare workers**  
and has a direct impact on mental health and wellbeing, employee  
satisfaction, retention, recruitment, and patient care.

83% *of nurses experienced  
WPV last year*

---

81% *of healthcare workers  
report burnout*

---

37% *considered leaving their  
profession due to WPV*

By empowering your staff with a comprehensive safety solution, you  
can reduce workplace violence, improve employee engagement and  
retention, and create the culture of safety your teams are craving.

# We Do Safety Differently

Safety Platform™ is the foundation of a layered safety plan. By uniting technology, it enables your staff to proactively plan and respond faster to emergencies.

Wearable Duress  
Technology

Digital and  
Incident Mapping

Accessible  
Reporting

Visitor Management  
and Locating

## Every. Second. Matters.®

Healthcare workers need a way to summon help immediately and discreetly when a situation arises.

This is paramount to impacting workplace violence.

### CrisisAlert empowers staff to signal for help anytime, anywhere on campus.

- Locating abilities are only activated when duress button is pressed, notifying responders of the exact location and person summoning help.
- Compressing the time between an alert and a response promotes de-escalation and mitigates violent incidents from occurring.

98%

of users say  
CrisisAlert helps  
them feel safe and  
supported

CrisisAlert locating  
abilities are **ONLY**  
activated when this  
button is pressed.

CENTEGIX

## **Wearable, Discreet Badge for ALL Staff**

*So anyone can signal for help at anytime*

## **Exact Location Identification**

*Immediately activated when alert is sent*

## **Total Campus Coverage**

*From patient rooms to parking lots and  
building to building*

## **No Wi-Fi or Cellular Service Required**

*A private and wireless Bluetooth network  
provides uninterrupted coverage*

CRISALERT HERE:

# The Power of Digital Dynamic Mapping

Safety Blueprint™ ensures responders are equipped to address an emergency on your campus. Its intelligent mapping optimizes response efforts by detailing campus floorplans, safety assets, and incident locations.

## Digital Critical Incident Mapping

- Visualize entire campus and safety assets on detailed, multi-level map
- Pinpoint exact location of assets and other incident response devices
- Highlight cameras within proximity of incident to offer real-time incident awareness
- Update and customize maps and assets to suit your facility's needs

**LEARN MORE ABOUT  
SAFETY BLUEPRINT HERE**

**"Combining incident mapping with wearable duress technology is the key to empowering our healthcare workers. Enabling staff to signal for help, and responders to see exactly who sent the alert and pinpoint where they are, is a huge step towards increasing workplace safety."**

Kevin Klauer, DO, EJD, FACEP, FACOEP

## Comprehensive and Accessible Reporting

Our data analytics dashboard lets you easily track trends, proactively plan, and adjust safety protocols based on your facility's needs.

Safety Platform helps you comply with legislative and accreditation standards for accessible and automated incident reporting.

# Enhanced Visitor Management

Our Enhanced Visitor Management, an additional capability offered with Safety Platform, lets you easily check in, authenticate, and locate visitors in real-time, giving you confidence and peace of mind about who's on your campus.

*Locate volunteers, contractors, and guests in real-time, through live digital maps*

*Provide administrators with campus-wide visitor visibility*

*Record and access historical visitor location details*

**Partner with CENTEGIX to enhance safety in your healthcare facility.**

CENTEGIX protects over 9,000,000 million people in over 12,000 facilities around the country.
