Texas Hospital Association Foundation

PEER REVIEW

Texas Hospital Association Foundation Peer Review Network

The **THAF Peer Review Network** is a comprehensive cloud-based system that facilitates the medical peer review process in a secure, efficient and cost-effective manner.

As a member of the THAF PRN, you will benefit by having a single platform for both internal and network (external to your facility, but within the THAF PRN) review processes to ensure the highest quality standard of patient care is being delivered.

PEER REVIEW IS REQUESTED ➡️ **SECURE, ENCRYPTED UPLOAD OF CHART**

REVIEW SUBMITTED AND OPTIONALLY ACCEPTED BY REQUESTING HOSPITAL ⬅️ **ASSIGNMENT TO REVIEWER, COMPLETED WITHIN THE THAF SYSTEM**

THAF Peer Review Network supports:

- Secure anonymity of peer reviewers
- Regulatory and credentialing compliance
- Consistent format for internal and external reviews
- Improved efficiency and security of peer review processes
- Customizable and downloadable reports.

Benefits:

- Portable
- Easy to use
- Secure
- Contained System
- HIPAA Compliant

Access to a Network Peer Review provides support when:

- There is a conflict of interest for available reviewers;
- Internal reviewers lack the necessary clinical expertise;
- The need to eliminate provider bias arises;
- Ambiguous or conflicting findings are present; and, or
- There is a lack of strong consensus for a finding.
